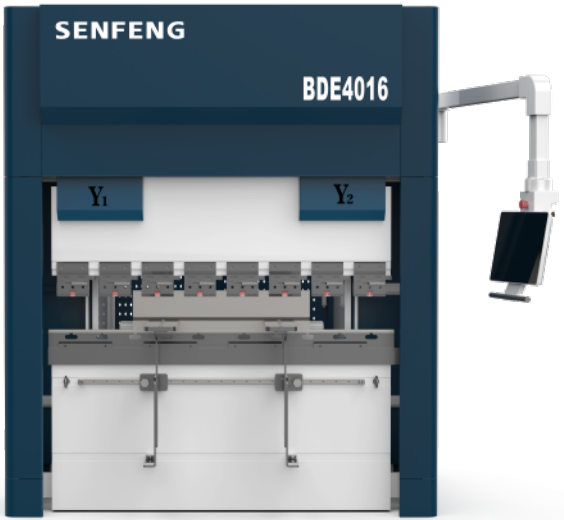
CNC Press Brake

CNC Press Brake

Bending force: 400kN
Max bending speed: 30mm/s



- Fit for bending thin sheet and precise workpiece
- 3 times (30mm/s) faster than hydraulic press brakes at least
- Need electric power only when bending, less or even no power consumption while sliding block moving and stopping
- Driven by electric power, no hydraulic oil required to prevent leakage or waste oil pollution
- Work with robot to bend automatically, so as to make manual labor easier and bending safer

Model		BDE4016
Bending Force (kN)		400
Bending Length (mm)		1600
Depth of Throat (mm)		250
Width Between Columns (mm)		1200
Open Height (mm)		470
Speed (mm/s)	Approach	200
	Bend	0-30
	Return	200
Overall Dimensions (L*W*H, mm)		2100*2290*1730
Machine Weight (kg)		3700
